# UK Education Garden

## Introduction

The UK Education Garden can design a course that fully meets individual student's needs. Our teachers have experience in tailoring courses to match students' exact requirements and making lessons interactive and dynamic. At the beginning of the course, the teachers will assess the students' level of English and requirements and will plan a program of study across their booked sessions. Students' progress will be monitored across the sessions and students are encouraged to reflect on the lesson with their teachers at the end of each session. At the end of the course, students will be provided with a summary of learning.
